

The Global Meeting Platform For
The World's EV Charger Brands

2-4 November 2023

Istanbul Expo Center / Hall 9-10

Electric Vehicle Charging Technology, Equipment Show and Conference

www.EVChargeShow.com

EXHIBITION AND CONFERENCE FOR EV CHARGING STATIONS

As the use of electric vehicles becomes widespread, electric vehicle charging options are becoming widespread at home, at work, on the roads and in all facilities. The need for charging electric vehicles is a valuable investment opportunity for entrepreneurs as a new business area. You will find the information, technology, equipment and more you need to take advantage of this opportunity at the EV Charge Show.

THE WORLD'S EV CHARGING BRANDS MEETS HERE

EV Charge Show is the world's e-mobility trade show and conference focusing on the charging infrastructure of electric vehicles. EV Charge Show, Electric Vehicle Charging Technology and Equipment Show and Conference, will bring together hardware and software manufacturers, service providers, solution partners and all parties involved in the e-mobility sector required for charging electric vehicles with public and private sector investors. It will be held for the second time at Istanbul Expo Center on November 2-4, 2023.

As part of the European Climate Package, the EU has announced that from 2035 the sale of the combustion engine vehicles was decided to be banned.

A close-up photograph of a person's hand holding a white and black EV charging cable. The cable has a black connector with several circular ports. In the background, another similar cable is plugged into a charging station.

THE WORLD'S EV CHARGER BRANDS MEET HERE

At the EV Charge Show 2022, we focused on Turkey's needs in electric vehicle charging. We are working to bring together relevant business people from all over the world, with the vision of becoming the "Global Meeting Platform of Electric Vehicle Chargers Brands" by 2023.

Investors Keep Their Eyes On Us

Accurate and efficient charging is a must for electric vehicles, which are at the center of the new mobility era. The charging of electric vehicles is closely monitored by more and more investors, both in terms of its technological development and infrastructure. In this respect, there is the EV Charge Show as a unique platform for all brands offering products and services in this field to come together with investors.

Our Agenda Is The Whole World

We determine the session topics of the conference, which we organise simultaneously with the trade show, according to the information needed on a global scale, and offer the common language of the conference sessions in English, with simultaneous translation.

In Istanbul, the Capital of the World

We bring together brands and investors in Istanbul, the world's most important and easily accessible city. Istanbul, which is both a commercial and international center without visa barriers for citizens of most countries, is unique as a meeting platform. In the words of Napoléon Bonaparte, we are coming together in Istanbul, the Capital of the World. In addition, Istanbul offers an attractive business and travel experience for our guests with its historical and touristic riches, unique cuisine and accommodation infrastructure.

Promotion of the Event

We ensure that the event is announced to the relevant business people by using channels in two different categories, all over the world and regionally. We reach all business people related to the strategy we have created in digital advertising channels and take the necessary actions.

Invitation to Trade Associations and Non-Governmental Organizations

We inform and invite the relevant official institutions, trade associations, and all non-governmental organizations with a mission to transition to e-mobility, operating at national and international level, in all countries that have taken action on the transition to electric vehicles.

There Are Many Reasons

For You to Attend the EV Charge Show 2023 as Well!

Fair, Conference Sessions, Brand & Technology Talks

Meet manufacturers, suppliers, engineers and professionals in the EV Charge Show focused on the latest developments in the charging of electric vehicle industry.

20.000+
Visitors

200+
Exhibitors

20+
Countries

What's in 2023?

THE TRADE SHOW

How to Build an EV Charging Station
EV Charger Brands for Home and Facility Use
Services of EV Charging Operators
Energy Storage and Battery Management Systems for EV Charging Stations
and more solutions in the e-mobility ecosystem

CONFERENCE

At the EV Charge Conference, which is held simultaneously with the EV Charge Show, carefully selected session topics and esteemed speakers who are experts in their fields will deepen your knowledge about the technologies presented in the e-mobility ecosystem and the opportunities and threats to be faced in the transition to e-mobility. The conference is organized in cooperation with AVERE Turkey, the main supporter of the fair.

The conference sessions will be posted on our website as of June 2023.
